

Guide to apply for the 2018-2019 competition for Predoctoral trainee researchers (PIF)

For the 2018-2019 competition, you will need to apply using an [online form](#) on the Unitat de Personal Acadèmic website.

How to apply:

1. Chose the position/s you are interested in. Find the list of positions on this [file](#), there you have the department, position requirements profile, selection criteria and other relevant information. Each position has a reference number (ex. B18A0091) that you will need to provide while applying.
2. Click on the [online form](#) and fill it in.

PLEASE BEAR IN MIND:

- Files to upload – You will need to upload the following documents: ID (NIE, NIF or passport), curriculum vitae, your application form (find it on [Annex 3](#)) and a grade-weighted academic transcript for degree or master's degree courses, if applicable. The upload **file limit is 2 MB**.
- Digital signature – As stated in the competition call, in order to be admitted you need to digitally sign the application form (Annex 3). You can do it with any of the accepted certificates by the Generalitat de Catalunya, check them [here](#). To sign the document you just need to open it with Acrobat Reader, search for the certificate and click at the place where you want to place the signature and sign it. You will find a detailed guide on how to do it here: <https://seuelectronica.uab.cat/certificado-idcat>. If you cannot sign it digitally, you will need to upload your scanned application with your handwritten signature and hand it in at the UAB *Registre general*, or send it by postal mail to the following address:

Àrea de Personal Acadèmic
Universitat Autònoma de Barcelona
Plaça Acadèmica-Edifici A
Bellaterra (Cerdanyola del Vallès)

- Select the position/s of your choice: You can pick your position in the last field of the online form. Click on the empty field, fill in the position reference number and then it will appear below, just click on it to select it. As you can apply for more than one position, you will need to arrange them according to your preference, if you get more than one position, you will be assigned the one with the lowest number. The first you select will be number one, the second number 2 and so on. If you make a mistake, just delete your choice and make a new one. See on this image how you can do this:
